Offering 50 SimAngus & Charolais Bulls

*We look forward to visiting
with you at the ranch!*

WELCOME

How time moves at such a fast rate of speed. It is hard to believe another year has flipped on the calendar. Our 15th year of selling bulls in a structured format also shares milestones of 18 years of marriage, the first teenager in the Schrader household and mostly likely, the first set of reading glasses. As change remains ongoing, so does our commitment to raise seedstock that adds value to our customers. Our family truly enjoys the cattle business and the people that comprise the industry. So, we are thankful for the renewed and new interest in our program.

Modern framed, easy keeping, easy handling cattle that perform with favorable convenience traits, will always be the priority at Schrader Ranch. Consistency and uniformity fit firmly in that mix as well. Therefore, regardless of breed or breed percentages, our philosophy remains similar throughout. Chores are more enjoyable for all facets of the industry if cattle are thrifty, likeable and good looking.

We are thankful for the cooperators that we work with. Relationships with good people are always rewarding. We appreciate their efforts in helping meet our growing demand needs. The sale offering represents the top 25% of all males born from our collective operations. We appreciate their efforts in effectively culling.

We would like to thank all the staff at Suther Feeds and Direct Link. We truly appreciate all that our relationship with Suther's has done for us over the years. From an industry standpoint, they have supplied valuable information. We have had a valued relationship for 17 years and look to extend that for years to come.

Please feel free to stop by the ranch before sale day to view the cattle. Laci or I will be more than happy to talk cattle.

Thank you for your interest.

Spencer, Laci, Weston, Josi

EPD DEFINITIONS

EPD Definitions and Terms

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit www.simmmental.org. Listed below are the units in which ASA EPDs are expressed, you can find the full list online:

Calving Ease (CE): Percent of unassisted births when used on heifers.

Birth Weight (BW): Pounds of birth weight.

Weaning Weight (WW): Pounds of weaning weight.

Yearling Weight (YW): Pounds of yearling weight.

Milk (MLK): Pounds of weaning weight due to milk.

Carcass Weight (CW): Pounds of carcass weight at 475 days.

Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters.

Yield Grade (YG): Carcass yield grade score at 475 days.

Marbling (MRB): Carcass marbling score at 475 days.

Ribeye Area (REA): Square inches of carcass ribeye at 475 days.

Warner-Bratzler Shear Force (WBSF): Pounds of force required to shear a ribeye steak.

All-Purpose Index (API): Dollars per cow exposed under an all-purpose-sire scenario. (See \$ Indexes for more details.)

Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario. (See TI for more details.)
