

• 21ST ANNUAL CHAROLAIS & SIMANGUS BULL SALE •

SCHRADER *ranch*

TUESDAY, MARCH 21, 2023 | 1:00 PM AT THE RANCH
Top End Auction | 60 Charolais and SimAngus Bulls

*We look forward to visiting
with you at the ranch!*

WELCOME

Welcome to the 21st Annual Schrader Ranch Bull sale!

Our 21st sale represents 25 years of building a genetic program together for Laci and I. Faith and loyalty of our customers makes the continuation of this annual event possible. As a result, our commitment to progress and improvement doesn't waiver. With diligence to measure each data point with accuracy and integrity, we strive to provide a practical and predictable product.

The sale this year moves to a traditional auction format with continued growth in absentee bidding. DV auction will be hosting the online portion of the sale.

For those unfamiliar with our program, you will find bulls developed with enough calories to express performance differences and still maintain function and longevity. The goal is to deliver a fit, athletic breeding bull with minimal acclimation needed to a new environment.

Both the Charolais and Simmental programs are managed the same. Regardless the breed, it still all starts with the females. Quiet, easy calving cattle with functional udders and practical performance will always be key focuses for Schrader Ranch.

Please contact Laci, Weston, Josi or I with any questions. Cattle conversations are most rewarding for our family, and we look forward to assisting in any way possible.

Sincerely,
The Schrader Family

The Tank progeny have exceeded expectations. These cattle are moderate at birth, quiet, dense and fast growing. The second group being born here at the ranch appear to be following suit to their older siblings. Tank offers an out cross pedigree that worked extremely well on Ledger descendants.

DNA HD TESTING

The bulls were DNA-HD tested, increasing the accuracy of their EPD profiles. They also were tested for polled and color status. These results are reflected in the catalog. All bulls are PI-BVD Tested Negative.

For more information please contact Schrader Ranch.

More Pounds. MORE PROFIT.

Breeding good cattle isn't complicated. Cattle feeders give us the ultimate report card. According to Jared Wareham, Top Dollar Angus, "No other option offers the greatest terminal crossbreeding value from the ranch through the feeder like a really good set of smokes or buckskins that are at least 50% Angus or Red Angus."

Use a registered Charolais bull and genetic verification through CharAdvantage to earn more premiums.

Why?

- Market demand
- Predictability
- Increased weaning & yearling weights
- Easy calving
- More live calves
- Adaptability
- Value of Charolais-cross females

OMEGA BALANCER

POWERED BY

STRATA™
with omega-3 fatty acids

DEVELOPED BY

S Suther Feeds, Inc

Research proven improvement of conception rates, health and immune status, and percent cows bred when utilizing Suther Feed's Omega Balancer program for heifers, cows, bulls, and calves.

Most beef diets include feed ingredients that are rich in omega 6 fatty acids and low in omega-3 fatty acids. Omega-6 fatty acids cause inflammation, whereas omega-3 fatty acids cause anti-inflammation. Feeding Omega-6:Omega-3 fatty acids in a ratio of 8:1 is optimal for better and more efficient immune system function.

Omega balancer is a high EPA/DHA calcium salts form of omega-3s that is ruminally protected to reach targeted tissues for optimal absorption. Omega balancer can be added to minerals, protein supplements and/or grain mixes to achieve a diet balanced in fatty acids. Omega balancer is available in Suther Feeds products in either tub or meal form.

SOURCES OF OMEGA FATTY ACIDS

OMEGA-6s

- Alfalfa hay and silage
- Corn silage

SIMMENTAL BULLS EPD DEFINITIONS AND TERMS

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit www.simmental.org. Listed below are the units in which ASA EPDs are expressed, you can find the full list online:

Calving Ease (CE): Percent of unassisted births when used on heifers.

Birth Weight (BW): Pounds of birth weight.

Weaning Weight (WW): Pounds of weaning weight.

Yearling Weight (YW): Pounds of yearling weight.

Milk (MLK): Pounds of weaning weight due to milk.

Carcass Weight (CW): Pounds of carcass weight at 475 days.

Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters.

Yield Grade (YG): Carcass yield grade score at 475 days.

Marbling (MRB): Carcass marbling score at 475 days.

Ribeye Area (REA): Square inches of carcass ribeye at 475 days.

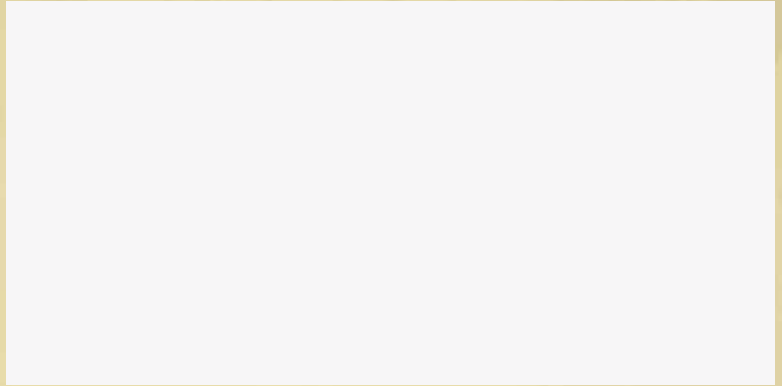

Warner-Bratzler Shear Force (WBSF): Pounds of force required to shear a ribeye steak.

All-Purpose Index (API): Dollars per cow exposed under an all-purpose-sire scenario. (See \$ Indexes for more details.)

Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario. (See TI for more details.)
